                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Sequence 4515, Application US/09969373
Patent No. US20020133852A1
GENERAL INFORMATION:
APPLICANT: Effectz, Roger J.
APPLICANT: ARANGE, Brian M.
TITLE OF INVENTION: Soybean SSRs and Methods of Genotyping
FILE REFERENCE: 38-10(52679)A
CURRENT APPLICATION NUMBER: US/09/969,373
CURRENT FILING DATE: 2001-10-02
PRIOR APPLICATION NUMBER: PCT/USO1/00667
PRIOR FILING DATE: 2001-01-30
PRIOR FILING DATE: 2001-01-30

                      Sequence 22, Application US/09774414

Patent No. US20020102231A1

GRNERAL INPORMATION:

APPLICANT: The Institute of Physical and Chemical Research

TITLE OF INVENTION: Endomuclease

FILE REFERENCE: PH-651

CURRENT APPLICATION NUMBER: US/09/774,414

CURRENT APPLICATION NUMBER: 05/306,970

PRIOR FILING DATE: 1999-05-07

NUMBER OF SEQ ID NOS: 38

SOFTWARE: PatentIN Ver. 2.0

SEQ ID NO 22

LENGTH: 18

Sequence 9, Application US/10043875

Sequence 9, Application WS/2003005433941

Sequence 9. Application No. US2003005433941

SEMENAL INFORMATION:

APPLICANT: De Smet, Koenraad

TITLE OF INVENTION: Method for Detection of Drug-Induced Mutations in the HIV Reverse

TITLE OF INVENTION: Transcriptase Gene

TITLE OF INVENTION: Transcriptase Gene

TITLE APPLICATION NUMBER: US/10/043,875

CURRENT APPLICATION NUMBER: US/10/043,875

PRIOR APPLICATION NUMBER: 60/286,102

Sequence 1816, Application US/09848754A
Publication No. US20030073207A1
REPERRAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
TITLE OF INVENTION: Levels of Epidermal Growth Factor Receptors
FILE OF INVENTION: Levels of Epidermal Growth Factor Receptors
FILE REPERRACE: MRHS00-958-I (400/18)
CURRENT FILING DATE: 2001-05-03
NUMBER OF SEQ ID NOS: 9645
SOFTWARE: Patentin Version 3.0
SEQ ID NO 1816
LENGTH: 17
TYPE: RNA
ORGANISM: Homo sapiens
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ö
